

## SM800 - Series 800W DC POWER SUPPLIES

Models	Voltage range	Current range
SM 7.5-80	0 - 7.5 V	0 - 80 A
SM 18-50	0 - 18 V	0 - 50 A
SM 70-AR-24	0 - 35 V	0 - 24 A
Autoranging output	0 - 70 V	0 - 12 A
SM 400-AR-4	0 - 200 V	0 - 4 A
Autoranging output	0 - 400 V	0 - 2 A

### Features

- Designed for long life at full power
- Excellent dynamic response to load changes
- Protected against all overload and short circuit conditions
- EMC surpasses CE requirements: low emission & high immunity
- Low audible noise: temperature controlled fans
- Available options: analog & digital Interfaces, High Speed Programming, Digital Encoders, Sequencer, Power Sink etc.

### Functionalities

- Master/Slave parallel and series operation with voltage and current sharing
- Stacking is allowed, space between units is not required
- High power system configuration from multiple units
- 19" rack mounting or laboratory use (feet included)
- Remote sensing
- Interlock

<b>Weight</b>	5.4 kg

Notes: 1. Measured at full load. 2. See "Safety instructions".

### Typical Applications

- Accurate current sources
- Automotive battery simulations
- Driving PWM-Controlled DC motors
- Electronic circuit design
- Controlled battery (dis)charging
- Medical research equipment
- Component device testing
- Lasers
- Aerospace and military equipment
- ATE in industrial production lines

### Available Options

#### Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability.

At some derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

Order Code :

- P069

#### High Speed Programming

A 10 to 20 times higher programming speed (down to 0.2ms rise time at full load) and lower output capacitance<sup>1)</sup>. Excellent for laser applications, test systems or as current source with low parallel capacitance as used in plasma chambers.

Order Codes :

- SM 7.5-80 P250
- SM 18-50 P251
- SM 70-AR-24 P252
- SM400-AR-4 P253

#### Two-Quadrant Output Power Sink

Two quadrant operation maintains the DC output voltage constant regardless the output power is positive or negative<sup>1)</sup>. Ideal for PWM-speed controlled DC-Motors and ATE systems.

Order Codes :

- SM 7.5-80 P245
- SM 18-50 P246
- SM 70-AR-24 P247
- SM400-AR-4 P248

#### Sequencer

Arbitrary Waveform generator or standalone automation. The sequencer is integrated in the Ethernet controller.

Order Code :

- P256

#### Digital CV- and CC-Settings

Reliable, long-life digital encoders can be implemented at the front panel. Includes total front panel lock (also for CV- / CC-knobs) and a coarse or fine pitch adjustment depending on the turning speed.

Order Code :

- P236

#### Secured Voltage and Current Settings

For maximum security, the CV/CC settings can be adjusted with a screwdriver only and are protected with a plastic cap from accidental adjusting.

Order Code :

- P001

#### Software Control and Interfaces

Interfaces to be installed by factory <sup>2)</sup>.

Order Codes:

- Ethernet controller (including sequencer) - P256
- ISO AMP Card - isolated analog - P249
- RS232 controller - P254

#### 19" Rack Mounting adapter

The 19" mounting adapters make it possible to position one or two units side by side in a 19" rack.

Order Codes:

- RA19 - 1SM800 (for 1unit)
- RA19 - 2SM800 (for 2units)

#### Front Power Output

Bind posts at the front panel instead of at the rear panel.

Order Codes :

- SM 7.5-80 n.a.
- SM 18-50 P257
- SM 70-AR-24 P258
- SM400-AR-4 P259

Notes: 1. Download datasheets about High Speed Programming, Power Sink and Battery Charging from [www.DeltaPowerSupplies.com](http://www.DeltaPowerSupplies.com).  
2. There is only room for one of the interfaces in a unit.

CV = Constant Voltage  
 CC = Constant Current

Specifications measured at  
 $t_{amb} = 25 \pm 5 \text{ }^\circ\text{C}$  and  $V_{in} = 230 \text{ VAC}$ ,  
 50 Hz unless otherwise noted.

The information in this document is
